

Raymond Grinding Mill for Sodium Bicarbonate

HC pendulum grinding mill can produce 80 to 800 mesh sodium bicarbonate, and the capacity can reach 1-25 tons per set. HC series grinding mills provided by HC Milling (Guilin Hongcheng) are also suitable to grind many non-metallic minerals such as limestone, calcite, marble, talc, gypsum, barite, fluorite, zeolite, manganese ore, ilmenite, phosphate rock, bentonite, starch, kaolin, etc.

The effect of sodium bicarbonate determines the market values of sodium bicarbonate. When it comes to the effect of sodium bicarbonate, people who have eaten buns know that it is used to ferment bread. Some moms are very clever and they use it to wash vegetables you can put some sodium bicarbonate on your toothpaste so as to remove pesticide residues. In addition, when you brush your teeth, you can put some sodium bicarbonate on your toothpaste so as to make your teeth whiter, but pay attention to the amount. There is also a new discovery in the role of sodium bicarbonate. Studies by the Second Hospital Affiliated to Zhejiang University of Medicine School have shown that sodium bicarbonate can treat cancer, but the using method is to inject sodium bicarbonate into the tumor instead of simply taking it orally. Obviously, for sodium bicarbonate, there are many effects, so it is a way to earn money by buying grinding mills to process sodium bicarbonate.

The mass production of sodium bicarbonate is inseparable from Raymond grinding mill for sodium bicarbonate.

HC series grinding mills mainly consist of main mill, classifier, the high-pressure blower, cyclone separator, pipeline system, motor, electromagnetic vibrating feeder and the electric control cabinet. For the HC pendulum grinding mill, there are two kinds of structure, namely the pendulum structure and horizontal structure. And it is equipped with a de-ironing device to reduce the content of metal elements such as iron. A set of HC series grinding mill can produce 4 to 30 tons of sodium bicarbonate per hour.

The price of HC series Raymond grinding mill

For the HC series Raymond grinding mill, we have different configurations and different models ranging from large, medium and small. Therefore, the equipped machines can be different. As to the production line of grinding mill, our professional staff will configure a complete plan according to the parameters you provide. And then you can know the approximate price of the production line.
